

Introductory Exercises

<https://lab.ebrains.eu> - run python notebooks

Select (e.g. Fenix CH)

navigate to "Modeling with NEURON-CoreNEURON" and double click on "README.ipynb"

In README.ipynb there are instructions on how to clone repositories into your "My Libraries". In particular

Lipid bilayer: <https://github.com/nrnhines/lipid-bilayer-exercise.git>

Voltage clamp to AP trajectory: <https://github.com/nrnhines/vclamp-ap-exercise.git>

<https://drive.brains.eu>

My Libraries

From this directory tree you can delete your private files and folders
